Passionate B.Tech CSE Core student at Vellore Institute of Technology, Chennai, eager to make an impact in the world of technology. Strong problem-solving skills, collaborative mindset and a continuous learner. Ready to contribute to innovative projects and embrace new challenges

EXPERIENCE

September 2023 - October 2023
Web Developer Intern *Internpe*, India
- Broadened practical experience in web development, encompassing both front-end and back-end aspects, and demonstrated my ability to work on diverse web applications.

August 2023 - September 2023
Data Science Intern - *Capabl*
- Built predictive models and machine-learning algorithms to analyse large data sets and draw useful conclusions, minimising introduction of errors into analysis processes.

August 2023 - September 2023
Data Science Intern - *Bharat Intern*
- Applied analysis skills, leveraging insights, developing and deploying data models and evaluating and improving existing models to create solutions.

May 2023 - Current
Technical Team Member *IEEE WIE VITCC*, Chennai, India
- Actively participated in discussions, organizing workshops, and driving technical excellence within the IEEE Women in Engineering community.

EDUCATION

2025
B.Tech. Computer Science Engineering
Vellore Institute of Technology, Chennai, TN
CGPA: 9.02

2021
12th CBSE (PCMI)
Indian Language School, Lagos, Nigeria
Grade: 93.8%

2019
10th CBSE
Indian Language School, Lagos, Nigeria
Grade: 96.2%

PROJECTS

- **Portfolio Website**
Oct 2023 - Nov 2023
- Designed and developed a portfolio website that features a clean and user-friendly design, provides information about my background and work, and includes a portfolio section with descriptions and links to my projects
- **Amazon Website Clone**
Sept 2023 - Oct 2023
- Website closely resembled Amazon's interface, offering a seamless and engaging user experience involving responsive design, intuitive navigation and product listings.
- **Number Recognition**
Aug 2023 - Sept 2023
- Successfully utilized the MNIST dataset to proficiently discern and interpret scanned handwritten digits by implementing Neural Networks.
- **Stock Price Prediction using LSTM**
Aug 2023 - Sept 2023
- Developed an LSTM-based model to predict the stock price of TESLA and delved into the world of financial data to make informed predictions.
- **Phishing Simulation Using Gophish**
May 2023 - Jul 2023
- Used Gophish for crafting realistic phishing emails, customizing campaigns, tracking responses, and providing detailed reports to enhance security practices.
